"We are the perfect choice for your data center and connectivity project. We are constantly willing to smash down paradigms and pave the way to a new way of doing business – more flexibility, unique customer service and solutions tailored to your business."

2010
Company is founded by Chris Torto (CEO) with a focus on the digital infrastructure industry.

2012
The company opens its 2nd Data Center in Brazil (Jundiaí, São Paulo).

Fiber Network expanded to 3,000 km.

2014
Opening of 1st Data Center in Brazil (Campinas, São Paulo).

Dedicated fiber optic network built in São Paulo Metro Area.

2015
Opening of two more Data Centers in Brazil (Hortolândia, São Paulo and Fortaleza, Ceará).

Network connected to the submarine cable landing stations in Fortaleza.

Ascenty becomes Brazil's largest data center company.

2017
Ascenty sells its managed services unit and becomes 100% focused on infrastructure and connectivity.

Company opens 4 new Data Centers in Brazil.

2018
The world's largest data center company – Digital Realty, together with Brookfield, become Ascenty's new shareholders.

Accelerated growth plans as part of Digital Realty's global platform.

Simultaneous construction of 8 new Data Centers and network expanded to 4,500 km.

2019
Company opens 6 new Data Centers in Brazil.

Start of first construction in another Latin America country – Chile.

2020
7 Data Centers under construction: 3 in Brazil, 2 in Chile and 2 in Mexico.

Start of construction of dedicated fiber optic network in Mexico, set to launch in 2021.

Network connected to the submarine cable landing stations in São Paulo and Rio de Janeiro.

2021
10 new Data Centers under construction and expansion in 6 existing Data Centers.

Launch of the fiber optic network in México.

Start of construction of fiber optic network in Chile.

Our shareholders

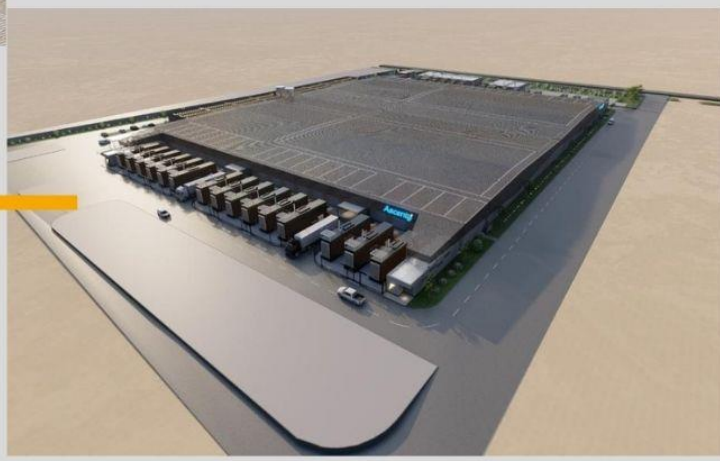
COLOCATION

When your data center is located inside your own company, one of the greatest concerns is expansion limit. Your technology needs increase as your business demand grows; but it is extremely difficult to grow and maintain the energy and infrastructure required when using internal facilities.

Ascenty offers a completely opposite scenario. The company's world-class infrastructure guarantees security, redundancy and a fully-scalable environment. It is your hardware in our house.

Chile 1

- 10 MW of total power
- 65,000 m² of building size
- 1,100 racks



Chile 2

- 31 MW of total power
- 226,000 m² of building size
- 3,550 racks
